GYAN GANGA INSTITUTE OF
TECHNOLOGY AND SCIENCES

- Bachelor of Technology in
Computer Science
- GPA: 7.75/10 (as of 4th semester)

PROJECTS

SkillVerse-AR

<https://skillversear.vercel.app>

Augmented Reality Based Skill Training Software

- Developed SkillVerse-AR, a mobile-first AI-powered AR training platform using React, Tailwind, Supabase, Gemini API, and Vercel, enabling immersive job simulations with real-time feedback and role-based dashboards.
- Implemented full-stack architecture with LLM-driven simulation creation, AR workflows, institutional analytics, and secure access control, delivering a scalable system with reporting and offline support.

ResQVerse

*Collaborated

<https://res-qverse.vercel.app/>

Disaster Management tool for Institutions and School

- Developed ResQVerse, a gamified disaster preparedness platform using story-based learning and 2D simulations to educate students on earthquake, flood, fire, and pandemic response with real-time localized alerts.
- Built a full-stack scalable system with institutional dashboards, progress tracking, and certification to enable schools and colleges to conduct structured disaster drills and awareness programs.

Well Being Hub |

*Collaborated

<https://wellbeinghub.netlify.app>

AI-driven platform for emotional well-being

- Developed WellBeingHub, an AI-powered mental wellness platform featuring chatbot support, mood tracking, and therapy modules (audio, yoga, laughter) to promote daily emotional well-being.
- Implemented a responsive web interface with integrated AI services to deliver personalized recommendations and self-care resources, focusing on accessibility and user experience.
